

SYNTHESIS, CHARACTERIZATION AND APPLICATIONS OF NANOCRYSTALLINE METAL OXIDES

No. 015/SRSPS/2009/CSTE; Dated 9/12/2011

Project report submitted to
Kerala State Council for Science, Technology and Environment (KSCSTE)

DR. THOMAS VARGHESE (PI)
DR. JASEENTHA O.P (Co-PI)

620 5 THO-S

PR0015

CONTENTS

	<i>Page No.</i>
PREFACE	i
ACKNOWLEDGEMENTS	iii
PROJECT COMPLETION REPORT	v
1. INTRODUCTION	1-5
1.1 <i>Metal Oxides</i>	1
1.2 <i>Aim and Scope</i>	3
1.3 <i>Project Report</i>	4
<i>References</i>	4
2. SYNTHESIS	6-22
2.1 <i>Introduction</i>	6
2.2 <i>Sol-gel synthesis of TiO₂</i>	7
2.2.1 <i>Materials and Methods</i>	8
2.3 <i>Synthesis of Ce doped TiO₂</i>	9
2.3.1 <i>Materials and Methods</i>	10
2.4 <i>Synthesis of TiO₂/Cobalt Phthalocyanine Nanocomposite</i>	12
2.4.1 <i>Materials and Methods</i>	12
2.5 <i>Synthesis of CeO₂</i>	13
2.5.1 <i>Materials and Methods</i>	13
2.6 <i>Synthesis of NiO</i>	15
2.6.1 <i>Materials and Methods</i>	15
2.7 <i>Synthesis of MnWO₄</i>	16
2.7.1 <i>Materials and Methods</i>	17
2.8 <i>Synthesis of Ag₂WO₄</i>	18
2.8.1 <i>Materials and Methods</i>	18
<i>References</i>	19

3. CHARACTERIZATION

	23-8
3.1 TiO ₂ Nanoparticles	23
3.1.1 X-ray Diffraction Studies	23
3.1.2 Transmission Electron Microscopy Analysis	26
3.1.3 Fourier Transform Infra-red Spectroscopy	28
3.1.4 Raman Spectra of TiO ₂	29
3.1.5 Effect of Electron Beam Irradiation on TiO ₂ Nanoparticles	33
3.1.5.1 Raman Spectroscopy	33
3.2 Ce doped TiO ₂	38
3.2.1 XRD of Ce doped TiO ₂	38
3.2.2 SEM Analysis	40
3.3 TiO ₂ /Cobalt Phthalocyanine Nanocomposite	41
3.3.1 XRD Studies	41
3.3.2 SEM Analysis	42
3.4 CeO ₂ Nanoparticles	43
3.4.1 Thermal Studies	43
3.4.2 XRD Studies	45
3.4.3 FTIR Spectra of CeO ₂	48
3.4.4 TEM Analysis	50
3.4.5 Raman Studies	51
3.4.6 Effect of EB Irradiation on CeO ₂ Nanoparticles	52
3.4.6.1 XRD Analysis	52
3.4.6.2 Raman Spectroscopy	54
3.5 NiO Nanoparticles	56
3.5.1 Thermogravimetric Analysis	56
3.5.2 XRD Studies	57
3.5.3 SEM Analysis	59
3.5.4 Energy dispersive X-ray analysis	59
3.5.5 TEM Analysis	61
3.5.6 FTIR Analysis	63
3.5.7 Effect of high energy EB irradiation on NiO	64
3.5.7.1 XRD Studies	64
3.6 MnWO ₄ Nanoparticles	66
3.6.1 XRD Studies	66

3.6.2 TEM Analysis	67
3.6.3 Effect of EB Irradiation	69
3.6.3.1 XRD Analysis	69
3.6.3.2 Raman Spectra	70
3.7 Ag ₂ WO ₄ Nanoparticles	73
3.7.1 Thermal Studies	73
3.7.2. XRD Analysis	75
3.7.3 FTIR Analysis	77
3.7.4. SEM Analysis	78
3.7.5 Energy Dispersive X- ray Analysis	79
3.7.6 TEM Analysis	80
3.7.7 Raman Spectroscopy	82
References	85
4. OPTICAL STUDIES	90-125
4.1 Optical Studies of TiO ₂	90
4.1.1 Effect of EB Irradiation	93
4.1.2 Ce Doped TiO ₂	97
4.1.2.1 Photocatalytic Activity	100
4.1.3 Optical Studies of TiO ₂ /CoPc Nanocomposite	103
4.2 Optical Studies of Nanoceria	106
4.3 Optical Studies of NiO Nanocubes	109
4.3.1 CIE Chromaticity Studies	112
4.4 Optical Studies of MnWO ₄	114
4.5 Optical Studies of Ag ₂ WO ₄	117
4.5.1 CIE Chromaticity	121
References	122
5. ELECTRICAL STUDIES	126-151
5.1 Dielectric Studies of TiO ₂	126
5.2 Dielectric studies of CeO ₂	130
5.3 Electrical Studies of MnWO ₄	136
5.3.1. Effect of EB Irradiation	140

5.4 Electrical Studies of Ag_2WO_4	142
5.4.1 DC resistivity	143
5.4.2 Dielectric Studies	144
References	150
6. ANTIMICROBIAL STUDIES	152-171
6.1 Introduction	152
6.2 TiO_2 Nanoparticles	153
6.2.1 Materials and Methods	153
6.2.1.1 Preparation of TiO_2 Nanoparticles Suspension	154
6.2.1.2 Antibiotic Resistance Pattern	154
6.2.1.3 Antibacterial Activity by Well-Diffusion Method	154
6.2.2 Results	155
6.2.3 Discussion	157
6.3 Effects of TiO_2 on Symbiotic Arbuscularmycorrhizal Fungi in Plant Roots	158
6.3.1 Introduction	158
6.3.2 Effect of TiO_2 NPs on AM Fungal Colonization in Plants	160
6.3.3 Results and Discussion	162
6.3.4 Conclusions	165
References	165
7. SUMMARY	172-175
7.1 Introduction	172
7.2 Conclusions	172
7.3 Suggestions for the future work	175
